

## SD-card clone

In order to make a clone of your SD-card, another SD-card that has a maximum of 2GB of storage is required.

The process is very easy and uncomplicated and described a here:

<http://www.partition-tool.com/easeus-partition-manager/clone-sd-card.html>

This process is for a data backup of the entire data of the 2 GB SD-card.

This process may only be done by skilled personnel.

Ecodata does not assume any liability for data loss.
